

Industrial Internship Report on "Digital Marketing"

Prepared by
Nikhitha Palangthod

Executive Summary

This report provides details of the Industrial Internship provided by upskill Campus and The IoT Academy in collaboration with Industrial Partner UniConverge Technologies Pvt Ltd (UCT).

This internship was focused on a project/problem statement provided by UCT. We had to finish the project including the report in 6 weeks' time.

My project was in the domain of digital marketing where I had my hands-on experience 5 different industry projects spanned across digital marketing, product launch, competitive analysis, content marketing and website design.

This internship gave me a very good opportunity to get exposure to Industrial problems and design/implement solution for that. It was an overall great experience to have this internship.

1 Preface

In this Internship , I've worked on various industry projects.

The 1st project focused on creating a targeted Meta Ads audience for an edtech company's digital marketing course by conducting in-depth market research to identify and reach potential learners based on various demographic and behavioral factors.

The 2nd project was about creating a strategy which aims to generate excitement for the smartwatch launch by targeting specific demographics. It involves pre-launch activities, influencer collaborations, user-generated content, and educational content to create a buzz and provide value to potential customers.

In the 3rd project, we analyzed top payment gateways (PayPal, Stripe, etc.) to identify strengths and weaknesses, recommending actionable strategies to position the company's new service for success in a competitive market.

In the 4th project, we created a content marketing strategy for the FMCG company that aimed to increase brand awareness, drive sales, and foster customer loyalty through engaging content across various platforms, focusing on product benefits, valuable information, and building a strong connection with the target audience.

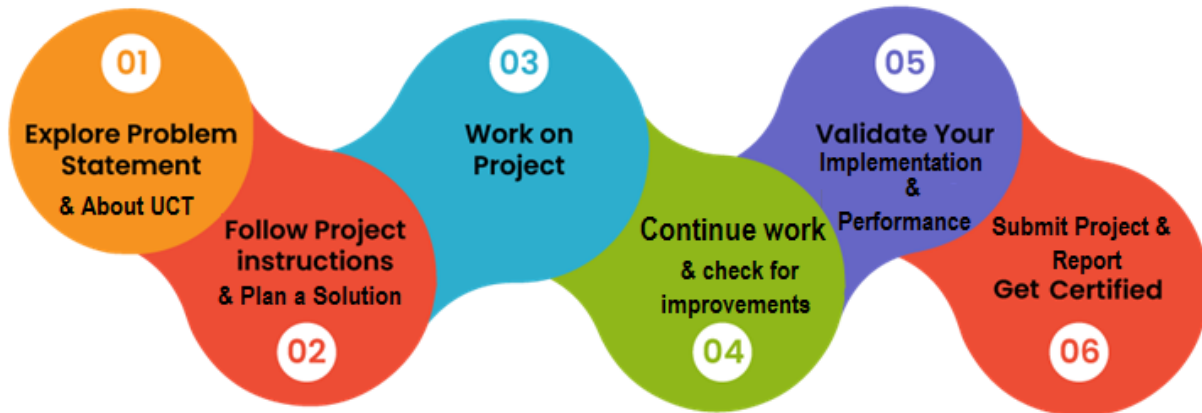

The 5th project was about designing a structure for e-commerce website which emphasizes a clear hierarchy with three main categories (Electronics, Clothing, and Home Goods), enhancing user navigation and search engine crawlability through robust internal linking, optimized URLs, and a visual flowchart.

Internship plays a vital role in career development and in gaining professional skills related to the particular field. It provides you a real-world experience and also allow you to explore different career paths and industries which helps you further in making informed career decisions.

My project is about digital marketing and how it changes the business overview and brings in opportunities . I have explored digital marketing in different industries like an Edtech company, an electronic company, a FMCG company , e-commerce website and also worked on competition analysis for payment gateway through this internship.

I am grateful for this opportunity given by Upskill Campus and UCT. This internship has made a huge difference in my career development and broaden my industrial approach.

How Program was planned

2 Internship Learnings and Overall Experience

Key Learnings from Projects:

1. **Targeted Marketing:** The first project taught me the importance of conducting thorough market research to create highly targeted advertising campaigns. Understanding the demographics and behaviors of potential customers is essential for maximizing ad effectiveness.
2. **Social Media Strategy:** The second project emphasized the power of social media in generating excitement and building anticipation for a new product launch. Influencer collaborations and user-generated content can be effective tools for creating a buzz and engaging with the target audience.
3. **Competitive Analysis:** The third project highlighted the importance of analyzing competitors to identify opportunities and potential pitfalls. By understanding the strengths and weaknesses of other payment gateways, we were able to develop a more competitive strategy for our company's new service.
4. **Content Marketing:** The fourth project reinforced the value of content marketing in building brand awareness, driving sales, and fostering customer loyalty. Creating engaging content that provides value to the target audience is crucial for building a strong connection and driving conversions.
5. **Website Structure:** The fifth project emphasized the importance of a well-structured e-commerce website for both user experience and search engine optimization. A clear hierarchy and optimized URLs can significantly improve user navigation and search engine rankings.

Overall Experience:

My internship experience was incredibly valuable and rewarding. I gained practical experience in various areas of digital marketing, including market research, social media strategy, competitive analysis, content marketing, and website design. I also had the opportunity to work on real-world projects and learn from experienced professionals.

One of the most valuable aspects of my internship was the ability to apply my theoretical knowledge to practical situations. This helped me solidify my understanding of digital marketing concepts and develop practical skills that will be essential for my future career.

I am grateful for the opportunity to have participated in this internship program. The experience has significantly enhanced my skills and knowledge, and I am confident that it will be a valuable asset as I continue my career in digital marketing.

Through this internship, I learnt to create an optimized and effective audience for meta ads which will give better return on investment. I am able to formulate, implement and execute an effective social media campaign for a new product launch in the market which increases awareness for the product. I have performed an in depth competition analysis that helps in identifying pros and cons of the company's strategy and enhance it to get more returns. I was capable to formulate, implement and execute content marketing strategy to attract potential customers. I was able to develop a website design structure that is easy in navigation and indexed by search engines.

I would like to thank UCT and Upskill campus team in launching this internship and helping me as soon as possible whenever I am stuck at something. I deeply appreciate their efforts in helping all the interns by guiding them in a right path.

I congratulate my fellow peers that we have finally made it to the end in such a fun-learning way in this internship. And I encourage juniors to enhance their learning as upskill campus is always ready to help you with their experts.

3 Introduction

3.1 About UniConverge Technologies Pvt Ltd

A company established in 2013 and working in Digital Transformation domain and providing Industrial solutions with prime focus on sustainability and RoI.

For developing its products and solutions it is leveraging various **Cutting Edge Technologies** e.g. **Internet of Things (IoT), Cyber Security, Cloud computing (AWS, Azure), Machine Learning, Communication Technologies (4G/5G/LoRaWAN), Java Full Stack, Python, Front end** etc.

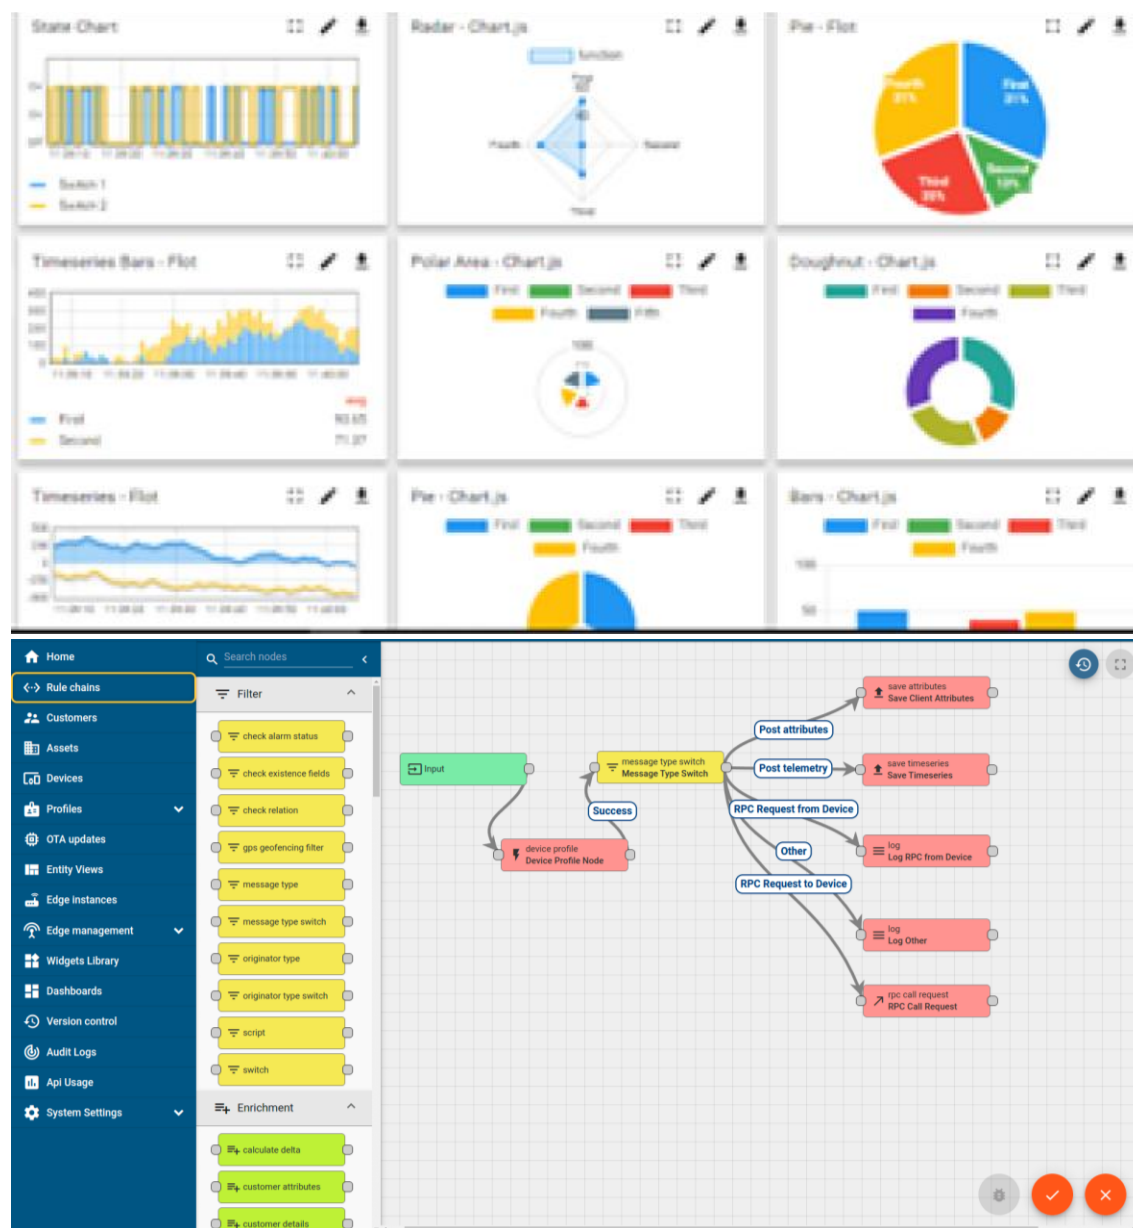

i. UCT IoT Platform (uct Insight)

UCT Insight is an IOT platform designed for quick deployment of IOT applications on the same time providing valuable “insight” for your process/business. It has been built in Java for backend and ReactJS for Front end. It has support for MySQL and various NoSql Databases.

- It enables device connectivity via industry standard IoT protocols - MQTT, CoAP, HTTP, Modbus TCP, OPC UA
- It supports both cloud and on-premises deployments.

It has features to

- Build Your own dashboard
- Analytics and Reporting
- Alert and Notification
- Integration with third party application(Power BI, SAP, ERP)
- Rule Engine

FACTORY WATCH

ii. Smart Factory Platform ()

Factory watch is a platform for smart factory needs.

It provides Users/ Factory

- with a scalable solution for their Production and asset monitoring
- OEE and predictive maintenance solution scaling up to digital twin for your assets.
- to unleash the true potential of the data that their machines are generating and helps to identify the KPIs and also improve them.
- A modular architecture that allows users to choose the service that they want to start and then can scale to more complex solutions as per their demands.

Its unique SaaS model helps users to save time, cost and money.

Machine	Operator	Work Order ID	Job ID	Job Performance	Job Progress		Output		Rejection	Time (mins)				Job Status	End Customer
					Start Time	End Time	Planned	Actual		Setup	Pred	Downtime	Idle		
CNC_S7_81	Operator 1	WO0405200001	4168	58%	10:30 AM		55	41	0	80	215	0	45	In Progress	i
CNC_S7_81	Operator 1	WO0405200001	4168	58%	10:30 AM		55	41	0	80	215	0	45	In Progress	i

iii. LoRaWAN based Solution

UCT is one of the early adopters of LoRAWAN technology and providing solution in Agritech, Smart cities, Industrial Monitoring, Smart Street Light, Smart Water/ Gas/ Electricity metering solutions etc.

iv. Predictive Maintenance

UCT is providing Industrial Machine health monitoring and Predictive maintenance solution leveraging Embedded system, Industrial IoT and Machine Learning Technologies by finding Remaining useful life time of various Machines used in production process.

3.2 About upskill Campus (USC)

upskill Campus along with The IoT Academy and in association with Uniconverge technologies has facilitated the smooth execution of the complete internship process.

USC is a career development platform that delivers **personalized executive coaching** in a more affordable, scalable and measurable way.

Seeing need of upskilling in self paced manner along-with additional support services e.g. Internship, projects, interaction with Industry experts, Career growth Services

upSkill Campus aiming to upskill 1 million learners in next 5 year

<https://www.upskillcampus.com/>

3.3 The IoT Academy

The IoT academy is EdTech Division of UCT that is running long executive certification programs in collaboration with EICT Academy, IITK, IITR and IITG in multiple domains.

3.4 Objectives of this Internship program

The objective for this internship program was to

- get practical experience of working in the industry.
- to solve real world problems.
- to have improved job prospects.
- to have Improved understanding of our field and its applications.
- to have Personal growth like better communication and problem solving.

4 Problem Statement

The assigned problem statement states how the digital marketing actually make a difference in businesses across different industries . It describes how an e-commerce website structure, content marketing strategy, social media strategy , competition analysis and google/ meta ads makes a distinct difference and enhances company's profit.

5 Existing and Proposed solution

The existing solutions provided by others and their limitations:

1. **Websites:** Creating a simple website was a first step for many businesses to establish an online presence. However, many early websites were static and lacked features like e-commerce or customer interaction.
2. **Email marketing:** Businesses started using email to reach customers directly, but early email marketing efforts were often spammy and lacked personalization.
3. **Search engine optimization (SEO):** Businesses recognized the importance of optimizing their websites for search engines, but early SEO techniques were often based on keyword stuffing and link buying.

Though the above ones are indeed optimal solutions to the businesses but they need much more customized solutions that target potential customers and maintain the consumer loyalty. In my opinion, the limitation that still affect the digital marketing are lack of sophistication, limited data to gain insights, low trust and rapidly evolving landscape.

What is your proposed solution?

Proposed Solution: A Comprehensive Digital Marketing Platform

I propose a comprehensive platform that incorporates the following features:

1. Centralized Dashboard:

- **Unified management:** A single platform to manage all digital marketing activities, from website analytics to social media campaigns and email marketing.
- **Real-time insights:** Access to real-time data and analytics to track performance and make data-driven decisions.

2. AI-Powered Recommendations:

- **Personalized strategies:** AI algorithms to analyze vast amounts of data and provide tailored recommendations for optimizing marketing efforts.
- **Predictive analytics:** Forecast future trends and anticipate customer behavior to stay ahead of the competition.

3. Integrated Tools:

- **All-in-one solution:** A suite of integrated tools for content creation, social media management, email marketing, and advertising campaigns.
- **Seamless workflows:** Streamlined processes to improve efficiency and reduce errors.

4. Scalability:

- **Growth-friendly:** A platform that can accommodate the evolving needs of businesses, from startups to large enterprises.
- **Flexible pricing:** Scalable pricing plans to match the budget and requirements of different businesses.

5. Customer Support:

- **Dedicated assistance:** A team of experts available to provide guidance, troubleshooting, and training.
- **Continuous support:** Ongoing support to ensure businesses can maximize the value of the platform.

6. Data Privacy and Security:

- **Robust measures:** Strong security protocols to protect sensitive customer data.
- **Compliance:** Adherence to relevant data privacy regulations (e.g., GDPR, CCPA).

By combining these features, this proposed platform aims to address the challenges faced by businesses in digital marketing, such as fragmentation, lack of measurement, resource constraints, and the rapidly changing landscape. It provides a centralized, AI-powered solution that empowers businesses to make data-driven decisions, optimize their marketing efforts, and achieve their goals more effectively.

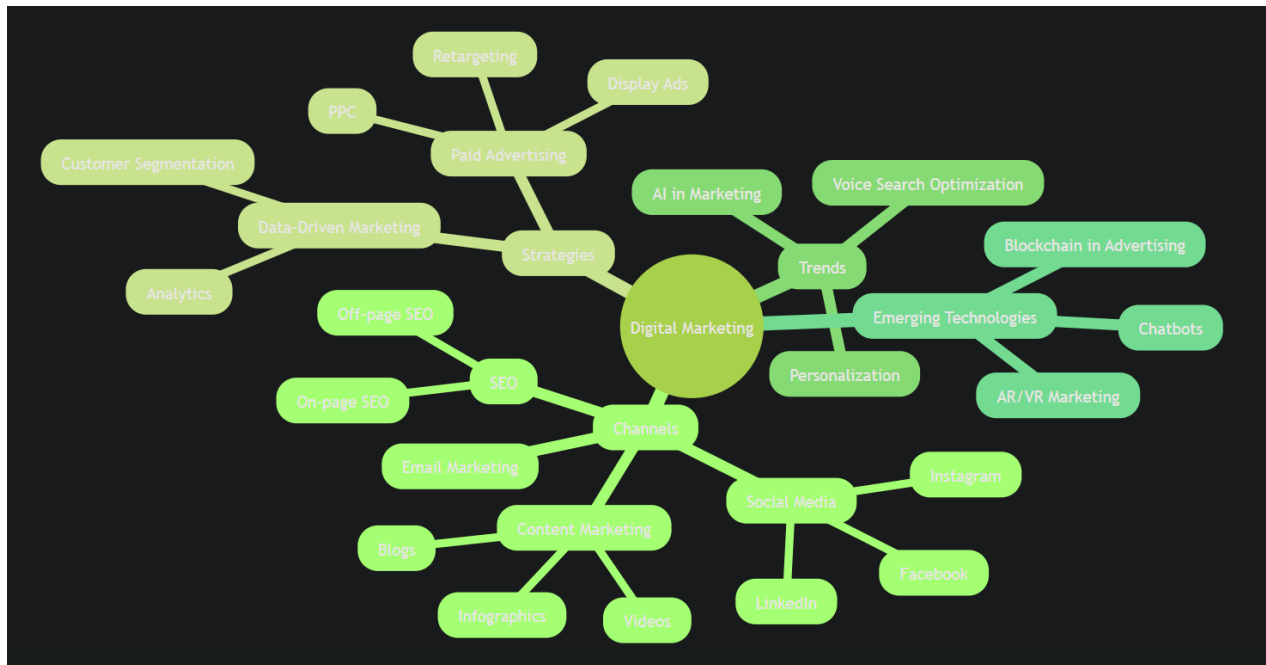

The proposed solution aims to provide a comprehensive, AI-powered platform that empowers businesses to make data-driven decisions, optimize their marketing efforts, and achieve their goals more effectively. By addressing the challenges faced by businesses in digital marketing, the platform can help them improve efficiency, enhance ROI, and gain a competitive advantage in today's rapidly evolving digital landscape

5.1 Code submission (Github link)

5.2 Report submission (Github link) :

6 Proposed Design/ Model

6.1 High Level Diagram (if applicable)

6.2 Low Level Diagram (if applicable)

6.3 Interfaces (if applicable)

Update with Block Diagrams, Data flow, protocols, FLOW Charts, State Machines, Memory Buffer Management.

7 Performance Test

This is very important part and defines why this work is meant of Real industries, instead of being just academic project.

Here we need to first find the constraints.

How those constraints were taken care in your design?

What were test results around those constraints?

Constraints can be e.g. memory, MIPS (speed, operations per second), accuracy, durability, power consumption etc.

In case you could not test them, but still you should mention how identified constraints can impact your design, and what are recommendations to handle them.

7.1 Test Plan/ Test Cases

7.2 Test Procedure

7.3 Performance Outcome

8 My learnings

Summary of my overall learning:

Target Audience Analysis:

- **Importance of Understanding:** I learned the critical role of understanding the target audience (demographics, interests, behaviors) for effective marketing campaigns. This skill will be crucial in creating targeted messaging and choosing the right platforms to reach the right people.

Meta Ads Audience Strategy:

- **Reaching Your Ideal Customers:** I saw how Meta Ads can be used strategically with precise audience criteria like locations, age ranges, and interests to attract potential learners for an EdTech company. This knowledge will be valuable in tailoring ad campaigns for any industry.

Smartwatch Launch Strategy:

- **Generating Pre-Launch Hype:** The pre-launch strategy with contests and influencer collaborations exemplifies how to build excitement around a new product launch. This approach will be useful for any industry promoting a new offering.
- **Engaging Content Strategy:** The focus on user-generated content and educational content highlights the importance of creating valuable content that resonates with the target audience. This skill will be essential for building brand loyalty and driving engagement.

Competitive Analysis:

- **Learning from the Best:** Understanding how to conduct a comprehensive competitive analysis like the one done for the payment gateway service is invaluable. Identifying strengths and weaknesses of competitors allows us to develop our own service with a clear advantage.
- **Actionable Strategies:** This analysis showed how to translate insights from the competition into actionable strategies for improvement. This skill will be crucial for developing successful marketing campaigns in any industry.

Content Marketing Strategy:

- **Content for Various Platforms:** The FMCG content marketing strategy demonstrated the power of creating engaging content across platforms (videos, blog posts, social media). This approach is essential for reaching a wider audience and building brand awareness.

- **Content Variety & Value:** Utilizing product demonstrations, behind-the-scenes content, recipes, and customer testimonials creates a well-rounded and valuable content strategy. This skillset will be beneficial for content creation across different industries.

E-commerce Website Structure:

- **User-Friendly Navigation:** Learning how to structure an e-commerce website for clear navigation (categories, subcategories) combined with SEO best practices (internal linking, URLs) will be crucial for any online business.

This internship has equipped me with a strong foundation in various digital marketing strategies. Understanding target audiences, creating engaging content, conducting competitor analysis, and optimizing website structure are all essential skills that will be highly valuable in my future career as a digital marketer.

By effectively applying these skills, I can help businesses of all sizes achieve their marketing goals, reach their target audience, and ultimately grow their success.

9 Future work scope

Some ideas that I would like to work on due to time limitation but can be taken in future are:

Email Marketing Personalization Experiment to test the effectiveness of personalized email marketing campaigns.

Influencer Marketing Case Study to analyze the impact of influencer marketing on brand awareness and sales for a specific product or service.
